Actively seeking opportunities in Software Testing & Analysis within the infotainment domain with a reputed organization across the industry
Location Preference: US / Europe

PROFILE SUMMARY

- An **ISTQB (Foundation Level) certified** professional with an experience of over 7.5 years in **software testing and analysis for various products and applications primarily in the infotainment domain**; currently associated with **Senior Software Engineer with Harman Connected Services**.

- **Proficient in manual testing across various domains like media, navigation & BT IOP** – demonstrated excellence in **Carplay and Android Auto testing** and exhibits theoretical knowledge of **CAN**

- Experienced in **preparation and review of test strategy, test cases & traceability metrics** while ensuring efficient test results reporting and defect management using **Bugzilla, Dev track, Bug tracker and Elvis.**

- Core competencies across **Software Development Life Cycle (SDLC), Software Test Life Cycle (STLC) and Defect Life Cycle** in diverse environments. Expertise in **Functional Testing, Regression Testing, System Testing and Integration Testing**.

- **Highly attentive to details with superior communication, analytical & interpersonal skills** with strong commitment to offer quality work. Skilled in handling multiple tasks, coordinating with all stakeholders (internal/external) and garnering information from requisite sources.

AREAS OF EXPERTISE

Software Testing Techniques • Manual Testing • Quality Assurance • Software Development Lifecycle • Software Testing Lifecycle • Test Strategy Design & Review • Test Case Design, Review & Execution • Technical/Quality Support • Infotainment Applications Testing • Traceability Metrics • Functionality, System and Regression Testing • Defect Management • Client Interaction

TECHNICAL PROFICIENCY

OS: Windows 2000, XP, Windows 7, Windows 8 • **Languages**: Unix (Basic Concepts) • **Database**: Oracle 8i
Tools: Bugzilla, Dev track, Bug tracker and Elvis

CERTIFICATIONS

Certified Tester Foundation Level (CTFL) • Certified International Software Testing Qualification Board (ISTQB)

PROFESSIONAL EXPERIENCE

HARMAN CONNECTED SERVICES (FORMERLY SYMPHONY TELECA) | Mar'10 – Till Date
Senior Software Engineer

- Playing a key role across the entire test execution phase which involves Functionality, System, Integration and Regression Testing of the applications primarily in the infotainment domain
- Defining and implementing test processes, strategies and approaches based on development methodology for medium / high complexity test requirements.
- Implementing different phases of manual testing including test planning, estimating and defect tracking till final closure.
- Dexterously involved in designing and reviewing the test cases based on functional specifications.
- Executing test cases, performed tasks related to bug tracking & reporting, and preparation of daily test report. Maintaining the bug report while strictly adhering to the Bug Life Cycle.
- Managing defects of the application by means of the specified tool and giving the final sign off to the product.
- Performing root-cause analysis of defects/ issues while documenting processes to prevent any reoccurrences
- Maintaining a continuous stream of information with the developers & other project team members through regular meetings to discuss issues and propose new ideas / suggestions

Key Highlights
- Achieved Spot award for outstanding performance in the month of April 2012, January 2013 and March 2015 and received team award for best project in March 2016.
